

Lubeca Marine Management (Philippines) Inc., based in Manila, is a technical ship management provider for three worldwide trading cargo ships. We are looking for a

TECHNICAL SUPERINTENDENT (M/F)

to plan, control and execute all activities connected with the operational readiness, maintenance, dry-docking and repair of the assigned vessels. This task includes coordination with the class and flag states as well as the control of all certifications.

The Technical Superintendent will visit the vessels for regular survey and maintain an effective and professional working relationship with the senior nautical and technical ship staff.

This position requires previous experience as inspector in an international shipping company and sea-service in a senior position on board ocean-going vessels. Good english language skills, computer skills, flexibility and ability to work independently is a must.

This position is open for immediate employment in the Philippines.
Kindly send your application to:
